

Albanian power utility KESH announced that it plans to invest some 11.6 million euros in 2016 in the modernization of hydropower plant Vau Dejes, which is a part of Drin cascade. The modernization will increase the efficiency of this 250 MW hydropower plant as well as the safety of its dams.

According to the data from the Ministry of Finance, KESH plans to invest 63 million euros in its production capacities in the next three years, of which almost 19 million euros will be invested in the modernization of HPP Vau Dejes, transmits Serbia-energy.eu
