

The Mayor of the city of Mostar Mario Kordic announced that the city will [build a 60 MW solar power plant](#) for its own needs in the effort to reduce [electricity costs](#).

Kordic said that the city is currently working on obtaining the required permits and expects that the **construction of the plant will start later this year**.

The city plans to use electricity produced by the solar power plant for public lighting, supplying public buildings and other uses.
