

The statement from the Cantonal Government said that the new wind farm will be built in the municipality of Tomislavgrad, without providing any further details regarding the project.

The Government of the Herzeg-Bosnia Canton in the Federation of Bosnia and Herzegovina (FBiH) said that it has accepted the request of the local company Concordia to grant it a concession for the construction of a wind farm.

Local media reported that in August, Concordia also submitted a request for a concession for the construction of small-scale solar power plant Baljci, with installed capacity of 150 kWh and estimated annual electricity generation of 180 MWh.
