

The municipality of Tomislavgrad said that the two Chinese investors - China National Technical Import & Export Corporation and Powerchina Resources, should start the construction of Iovik wind farm in 2022.

The statement from the municipality said that the future wind farm will have installed capacity of 84 MW, while the investment in its construction is estimated at 130 million euros. It will be located in the area between Tomislavgrad and Livno.

Last year, the Government of the Federation of Bosnia and Herzegovina (FBiH) has adopted information on activities in the process of issuing the energy permit and has given the Federal Ministry of Energy, Mining and Industry prior approval in the process of issuing this permit to local company VE Iovik for the construction of the Iovik wind farm, with an installed capacity of 84 MW (42 × 2 MW) and planned annual electricity production of 236 GWh.
