

Bosnia: Electricity price increase based on electricity trading levels in 2013

Categories : [SEE Energy News](#)

Date : July 4, 2014

Energy regulator decided on the new reference price of electricity of 5eurocents/kwh. This price was determined as a product of ponder achieved price in electricity trade in Bosnia during 12 months, may 2013-may 2014. The reference was the electricity trading made by trading license actors in Bosnia, license of second level and RES feed in tariff levels.

Decision will be in practice starting from 1.9.2014.

Energy regulator FERK also adopted the methodology for reference price determination, also the purchasing price of electricity from RES.
