

Director of “Gas-Res” Slobodan Puhac said that the mega-project “South Stream” is equally beneficial for both entities and their citizens, and that BiH does not have time for petty interests and wits when it comes to this project.

Puhac welcomed the agreement of the President of the Government of the Republic of Serbian Zeljka Cvijanovic and Prime Minister of the Federation of BiH /FBiH/ Nermin Niksic for gas pipeline.

“It is positive news that confirms that we are ready to take advantage of an exceptional opportunity for connection to South Stream, because the proximity of main route of the pipeline allows us project implementation of connecting, which will benefit both FBiH and the Republic of Serbian” said Puhac .

He said that all allusions to monopoly, high prices and a one-sided benefit of South Stream are absolutely baseless.
