

Bosnia: TSO company approves 17,5MEUR investment plan for new transmissions and substations

Categories : [SEE Energy News](#)

Date : September 25, 2014

Management of TSO grid company "Elektroprenos BiH" decided to initiate the process of public procurement worth 17.5MEUR. That pertains to building and reconstruction of transmissions on the lines Visoko-Fojnica, Tuyla-Lukavac and Kotor Varos - Ukrina, and substations Gradiska 2 and Mostar 9. The decision also refers to building and reconstruction of substations Bijeljina 1, Fojnica, Gradiška 2, Laktaši 2, Mostar 9-Buna, Tuzla 3, Visoko i Žepče.

From "Elektroprenos BiH" was announced that decision also pertains to procurement and implementation of business-information systems which will comprehend all business processes in this company, as well as procurement of IT equipment.

In addition, it is said that public procurement process for reconstruction of headquarters' building is in progress.

"Elektroprenos BiH" under procurement procedure has initiated and conducted tenders in the amount of 25 million EUR, up to August 2014.

From this company it is pointed out that launching these activities makes preconditions for realization of a large part of the approved plan.
