

Minister of Industry, Energy and Mining of Republika Srpska, Zeljko Kovacevic, said that the implementation of the project of thermal power plant “Ugljevik 3” took “excellent dynamics” and that the provision of project documentation for a building permit and construction beginning was underway.

- The campus for engineers and contractors admission has been made. At this point the construction of thermal power plant is not questioned - said Kovacevic answering at parliamentary questions during “Actual class” at a session of the National Assembly. Kovacevic said that so far 50 MEUR has been invested in researches and preparatory work, and that contractors mainly would be domestic business entities.
