

The project for the reconstruction of the major gas pipeline will receive funding through the Connecting Europe Facility (CEF) program.

Bulgarian natural gas transmission system operator Bulgartransgaz said that it has awarded a 23.4 million euros worth contract for the reconstruction of a section of a major gas pipeline to a consortium of local companies Glavbolgarstroy and Glavbolgarstroy International.

The statement from Bulgartransgaz said that the contract envisages the reconstruction of the gas pipeline connecting pigging facility Valchi Dol with valve station Preselka.
