

Swiss-based MET Renewables has submitted a request for the approval of its acquisition of 100 % capital of Enel Green Power Bulgaria, said Bulgarian Commission for the Protection of Competition (CPC).

Enel Green Power Bulgaria, a subsidiary of Italian Enel Green Power, operates 14 wind turbines with a total capacity of 42 MW through 14 fully-owned subsidiaries. The wind turbines are a part of two wind farms on the Black Sea coast - Shabla and Kamen Bryag, each with 21 MW installed capacity.

The acquisition is part of MET's growth strategy to develop a significant renewable portfolio in the region of Central and Eastern Europe.
