

CEE power market coupling and Romania within common market place CEPS-SEPS-MAVIR-OPCOM. , the view of a trader

Categories : [SEE Energy News](#)

Date : July 9, 2012

Regional power market and electricity trading in wider region of CEE/SEE is under constant reform process, different announcements on regional coupling are positive aspects for all energy traders. However most of the electricity traders from the region are stating that official and unofficial obstacles must be managed before the regional coupling.

Serbia Energy Magazine spoke with Radu Luca, trader from Romanian based Tinmar-Ind company on Romanian power market and its interdependency on regional trading.
