

The delegation of biggest Chinese energy corporation “Chinese international hydro energy corporation” lead by their manager Cen Lingun and Alfa energy represented by Dejan Jelic contracted the assessment of potentials for 200MW windmill park construction in municipality of Vladicin han.

According to Zoran Stojanovic deputy major, municipality officials signed a contract with Alfa energy for construction of 200mw windmill park on four different locations in municipality.

Wind measurements will start in may. All preparations will be done in one year and within 3 next years the wind turbines will be erected. Chinese corporation will invest 600 mil euros.

First feasibility and wind assessments proven excellent conditions for wind mills development but also for other renewable energy projects in this municipality. Chinese company is also interested in development of five mini hydro power plants.

The electricity produced from this future power generation facilities in Vladicin han will support local economy and budget, confirmed municipality officials to Serbia Energy.
