

Croatia: Power utility company HEP will supply Ina oil industry with electricity

Categories : [SEE Energy News](#)

Date : January 9, 2014

HEP Supply signed a supply contract with INA oil industry, which, with an annual consumption of more than 270 million kWh, is the second largest buyer of electricity in Croatia.

- By opening the electricity market, INA was first given the opportunity to select the winning bidder in the competition and thereby achieve additional savings in operating costs. This is another in a series of contracts that ensures us the highest quality requirements for our company, in line with our strategy of open tenders. We are pleased with achievements and we believe that we have reaffirmed partnership with HEP - said Tvrtko Perkovic, executive director of the Business function Corporate Center.
