

Renewable energy developer **Continental Wind Partners (CWP) Europe** said that it is planning to build a 400 MW [solar power plant](#) in Montenegro.

The company did not provide any further information on the project, but, according to local media, construction of the **Montechevo solar power plant**, which will be located near Cetinje, is expected to start in 2025 and it is expected to be completed by the end of 2026.

The expected annual [electricity generation](#) of the plant is 650 GWh, enough to cover the needs of some 154,000 homes.

The total investment in the project is estimated to 360 million euros.
