Electric power of Serbia (EPS) is planning to stop to import of electricity by 2015 due to increasing investments in production and efficiency, said EPS CEO Dragomir Markovic. On press conference he said that from 2011 until 2020 increasing of electricity consumption in Serbia for 14 percent is expected, but EPS will secure safe and quality supply of consumers through investments. EPS, from 2008 until 2011, invested proximately more than 500 million euro.
