

GE (NYSE: GE), a global technology leader and supplier of wind turbines and related services, is celebrating 10 years of industry leadership in wind energy. Since GE entered the industry through the acquisition of Enron Wind in 2002, it has installed 18,000 wind turbines and grown the business from 500 megawatts to 28 gigawatts of installed capacity. This year, GE expects its wind turbine installed base to exceed 20,000 worldwide. The company
