

Greece-Bulgaria electricity interconnection - increased capacity

Categories : [SEE Energy News](#)

Date : April 21, 2020

Greek electricity transmission system operator ADMIE informed that after performing security calculations at the SEE region and taking into account the modification of annual maintenance program in GR-BG interconnection for 2020, the NTC is increased to 550 MW (GRBG in both directions) for the period between 24 and 30 April 2020. These quantities will be allocated on daily auctions in accordance with relevant JAO Auction Rules.
