

OTE (Hellenic Telecommunications Organization) and the largest independent electricity producer in Greece Mytilineos Group have established a strategic partnership in retail electricity market.

According to this agreement, Mytilineos Group subsidiary Protergia, which owns more than 1,200 MW installed capacity in Greece, and OTE's subsidiary Cosmote, which is the largest mobile telephony retailer in Greece and owns a network of over 450 Cosmote and Germanos retail outlets throughout the country, will offer competitively priced electricity packages to customers. These packages will be available at aforementioned retail outlets as of 1 July. Through this partnership, Cosmote will enhance the range of products they offer to customers in their outlets, while Protergia will strengthen its points of sale and promotional network, transmits [Serbia-energy.eu](http://Serbia-energy.eu)
