

In the wake of the liberalization of the electricity market “EVN Group” presents a new company to supply “EVN supply”, which already owns a license for the supply of ERC.

- The changes in the market are preparing a longer period and already well know companies and their needs. We will offer support and impeccable service. Our offer is to remain transparent, because it is one of the key factors for the success of the free market. We have the knowledge and resources and offer a fair price for energy, and additional fees for use of the transmission and distribution network remain a regulated and they will determine Regulatory Commission, said Nico Barber, manager of “EVN supply.”

President of the Management Board of “EVN Macedonia” Werner Hengst said that with 8,000 employees and 14 million customers in more than 20 countries “EVN Group” have logistics experience and knowledge of liberalized markets.

- It is great support for the new company. Experience from other markets our group suggest that the success of the free market is the most important rules of the game clear and fulfillment of certain conditions. I am convinced that companies will recognize these attributes of “EVN supply,” said Hengst.
