

The European Bank for Reconstruction and Development (EBRD) announced that Macedonian electricity system operator MEPSO has published a tender for the rehabilitation of four of its substations.

The selected bidder will have to perform rehabilitation of the following substations: Oslomej, Valandovo, Bitola 2 and Skopje 4. The contract will be financed by EBRD with co-financing from MEPSO. The rehabilitation is expected to start on 30 April 2017 and will last about 24 months. The deadline for bid submission is 18 January 2017.
