

There is no doubt that the MB “Kolubara”, as the leading coal producer, whose lignite is used for generation of more than a half of the electricity in Serbia, has once again shown to be the country’s energy backbone.

When the minute-hand and the hour-hand, with the inevitable passage of time, coincide for the New year, 2012, people will wish each other good luck and success, and the Mining basin “Kolubara” will dig up the year
