

Decision on the reduction of a natural gas transmission fee by an average of 6.16 % enters into force on 1 January 2021. The decision was adopted by North Macedonian Energy Regulatory Commission (RKE).

RKE Chairman Marko Bislimoski said that the key reasons for reducing the natural gas transmission fee are the increased quantities of natural gas that will be transferred next year, as well as the impact of the reduced import price of natural gas. RKE decides on the natural gas transmission fee once a year.
