

Mayor of municipality Rudo, Rato Rajak, announced the beginning of HPP Mrsovo construction on the river Lim for the spring of this year. Rajak sees investment of about 100 MEUR as a major opportunity for employment.

- The concessionaire has completed researches on the site intended for the plant building and design documents, and in the spring it is expected to begin construction work on the infrastructure access, as well as plant building. In parallel with these activities the work will be carried on the expropriation process for the future accumulation needs. Timeframe for completion is three years - said Rajak.
