

Republika Srpska: TPP "Ugljevik" published a call for pre-qualification on construction of facilities for desulfurization of smoke gases

Mine and TPP "Ugljevik" published a call for prequalification for the Project of Flue Gas Desulfurization Facilities for TPP "Ugljevik".

Financing of this project is provided by Japanese Agency for International Cooperation's credit who had signed an agreement with BiH Ministers' Department on 20 October 2009. Like it was stated in the invitation text, mixed Holding "Elektroprivreda Republike Srpske" intends to do prequalification of interpreters or companies for construction of Smoke Gases Desulfurization Facilities with wet procedure limestone-plaster.

Facility will be constructed in one boiler block 300 MW strong. The project will be done in general sense, according to the "turnkey" principle (Lump Sum Turn Key- LSTK) including main and detailed engineering, purchase, construction, training and launching facilities.

A tender call is expected to be in January 2014.
