

“Electric Power Industry of Republika Srpska” ERS issued a public call for project of additional aggregate construction on the discharge of Popovo polje, on the facility HET 2, at the level of conceptual design.

The project, as stated in the call, is needed for energy efficiency of biological minimum, and therefore for solving their own power source for the drive of HPP Trebinje 2.

The call lasts until 20 September 2013.
