

## Revitalization of Unit B1 in TPP

**Categories :** [News Serbia Energy](#)

**Date :** July 5, 2012

The goals of this extraordinary project are the increase of production reliability of the Unit B1, the increase of efficiency degree for eight megawatts, extension of service life of the facility and reduction of adverse impact on environment.

When you leave for Sabac from Obrenovac, along the way which follows the right bank of the river Sava, out of the immense plane area, suddenly there springs the building of TPP
