

Energy company Hidroelectrica recorded in November, a profit of 29MEUR, an increase of 66% compared to the profit recorded in the same month last year due to measures to reduce operating costs and increase energy production.

Also, after the first 11 months Hidroelectrica recorded a record profit of 240MEUR, in increase of 28% compared to the period similar to last year when the company reported a profit of 188MEUR. For the full year 2014 is estimated to 268MEUR profit of over three times in May greater than the profit made by the company in 2010 when reported a record of production of 19.8 TWh.

In the first 11 months of 2014 Hidroelectrica delivered 17.1 TWh, exceeding 23% as the production of energy budgeted for the entire year 2014 and 24% production of energy related to the same period of 2013.

However, Hidroelectrica has registered the first 11 months of 2014 a turnover of 678MEUR business, an increase by 12% compared to the period similar to 2013.
