

We have found the Republic of Serbia to be an enabler in this process with less red tape than some other jurisdictions. Although some processes may take longer than they may in Canada or the U.S., unlike some other locations, in Serbia things do seem to follow the process they have mapped out and with few surprises, says Mr. Pennock.

Mr. Pennock is the speaker on upcoming conference on "2nd International Conference on Mineral Resources in the Republic of Serbia, "A Driving Force of Economic Development" organized by TGI Group International. [Conference link: http://www.tsomokos.rs/sr/projects/details/38/2nd-international-conference-on-mineral-resources-in-the-republic-of-serbia](http://www.tsomokos.rs/sr/projects/details/38/2nd-international-conference-on-mineral-resources-in-the-republic-of-serbia)

Serbia Energy Magazine had a pleasure of interviewing Mr. Pennock before the conference which will take place on 5th November in Belgrade.
