

Serbia: "Balkan Electric" starts the construction of 9MW wind farm "Alibunar I"

Categories : [News Serbia Energy](#)

Date : August 8, 2014

According to the office manager of the company "Balkan Electric", Mister Miroslav Kopecni, start of the construction of wind farm "Alibunar I" is predicted in 2015th. The project of the wind farm construction is the phase of main project design, for which construction has been elected the company "Energotehnika Juzna Backa" from Novi Sad.

Wind farm "Alibunar I" is located southwest of Alibunar, with total predicted installed power of 9MW, with three wind turbines and connection on the existing substation.

As say in the company "Balkan Electric", which is the main project investor, getting of the construction license is expected in the October 2014th.

In their statement also write that the company aim is the wind farm construction at the territory of the entire Serbia, especially at the south Banat. In the further future "Balkan Electric" thinks on the biomass use as the renewable energy source.
