

The representatives of the company said that this mini wind farm will have a power output of 6.6 MW and the value of the investment is about 10 million euros. It was pointed out that there are 50 workers currently employed at the project and during its construction the preparations for the construction of nearby 117 MW Kosava wind farm will start.

MK Fintel Wind, joint venture of local MK Group and Italian Fintel, has started the construction of La Piccolina wind farm near Vrsac.

The representatives of the company said that this mini wind farm will have a power output of 6.6 MW and the value of the investment is about 10 million euros. It was pointed out that there are 50 workers currently employed at the project and during its construction the preparations for the construction of nearby 117 MW Kosava wind farm will start.

Last November, the company has commissioned 9.9 MW wind farm near Kula, which is the first such facility in Serbia. It has three 178 meters high wind turbines, expected annual electricity generation of 27 GWh, while the value of the investment was around 15 million euros. After the completion of Kosava wind farm, MK Fintel Wind will operate a total of 133 MW in wind power, transmits Serbia-energy.eu
