Date : September 24, 2014

Deputy Prime Minister and Minister of Construction, Transport and Infrastructure Zorana Mihajlovic said today that Serbia is in energy crisis, because she has electricity shortage and will have to import it in the forthcoming period.

“Serbia has electricity deficit. Now pay 400.000 EUR daily for imports of electricity”, said Mihajlovic .

According to her, serious problem of electric power system is related to pits, and beside electricity that we lack, that we will be lacking and importing, we are going to import coal as well.

“The more coal we import, the less electricity we will import”, noticed the Minister and added that we also have gas and oil fuel deficit.
