

Serbia: Exclusive power market report 2014, DSO prices and market shares

Categories : [News Serbia Energy](#)

Date : January 24, 2014

Serbia Energy Business Intelligence desk presents latest power market report on electricity market start up for middle level voltage industrial consumers.

Industrial consumers, unprepared and uneducated for upcoming electricity second phase liberalization process of power market, faces risks and challenges in their electricity supply procurement processes.

More than 70 registered electricity traders will compete for clients and supply contracts.

DSO costs and challenges will impact the supply contracts. There are five DSO regions in Serbia all with different costs and differences in calculation of different active and reactive power systems.

Latest report provides in depth analysis of this market segment with number of analysis calculations and analysis matrixes for each of the regions in Serbia.
