

Serbia, Gas interconnections projects and plans, regional coupling

Categories : [Uncategorized](#)

Date : May 3, 2012

Priority direction of development in the gas sector of Serbia is connecting with the gas pipeline systems in the region. The planned international Southern Stream gas pipeline should provide enough capacities and security of supply on the territory of the Republic of Serbia, and provide the Republic of Serbia with the status of country of transit in the supply of European consumers with natural gas from the Russian Federation.

Interconnection with the Republic of Bulgaria
