

Initially, completion deadline for combined heat and power (CHP) Plant in Pancevo was planned for June but due to the coronavirus pandemic, Gazprom postponed the commission as Russian media reported.

General Manager of Gazprom Energoholding Denis Fedorov said that the commissioning is delayed by six months, namely by the end of the year. He explained that Gazprom planned for an accelerated commissioning of the plant with the Chinese contractor, but there was a problem with the supply of equipment and workers from China.

In 2015, Serbian oil company NIS, majority owned by Russian GazpromNeft, has signed an agreement with Gazprom Energoholding, a part of Gazprom Group, on the establishment of joint company for the construction of thermal power plant near Pancevo. In October 2017, NIS signed an Engineering, Procurement and Construction (EPC) contract on a turnkey basis worth 180 million euros with Shanghai Electric Group. It was initially expected that the construction of CHPP Pancevo will start in the second half of 2018 and be commissioned by the end of 2019.

The construction of CHPP Pancevo has officially started in March 2019. 200 MW power plant will be built within NIS' oil refinery complex in Pancevo, the project will cost 180 million euros and it is expected to be completed in mid-2020 and fully operational by the end of the year. It should contribute to an increase in the stability of supply of electricity, thanks to directing up to 65 % of the power produced to the energy system of Serbia, while also covering the needs of Pancevo refinery for electricity and steam.
