

Serbia; Power utility power gen facilities increased electricity production in 2nd Q 2013

Categories : [News Serbia Energy](#)

Date : June 10, 2013

Serbian Electric Power Utility produced 16,109 billion KWHs since the beginning of this year what is 4% higher than it had been planned.

Production in thermal and hydro power capacities is very good- it is stated in EPS.

HPPs have produced 5,6 billion KWH for 5 months this year and it is 24,5% higher than it had been planned and 16,6% higher than in the first 5 months 2012.

Overhauls in production facilities have begun, they are developing as it had been planned and there are no problems in electricity supply- it was stated in EPS.
