Date : June 2, 2016

Serbian power exchange SEEPEX has broken trading volume records in the last two days. First, at the auction held on 18 May, trading volume reached 3,658.2 MWh which was record high daily trading volume at the moment. But, at the auction held on 19 May new record was set, with 4,682.7 MWh of traded electricity. Base price at the auction reached 27.01 euros/MWh, while peak price reached 27.23 euros/MWh.

SEEPEX was officially launched on 17 February with traded volume 1,925 MWh and with base price of 23.83 euros/MWh. SEEPEX is jointly owned by Serbian EMS and European Power Exchange (EPEX SPOT) with the idea to support the development of a competitive, transparent and reliable electricity market in Serbia and Southeastern Europe and make a significant impact on the increase of trading volumes of electricity in the region, transmits Serbia-energy.eu
