

Serbia: Senvion contracts 42MW wind project services

Categories : [News Serbia Energy](#)

Date : October 3, 2016

Senvion has signed a conditional contract with Elicio for the delivery, installation and commissioning of 21 2MW MM100 turbines for the 42MW Alibunar wind farm in Serbia.

Installation is planned for autumn 2018 close to the Malibunar wind farm, where Senvion already closed another conditional deal with Elicio for MM100 units.

Senvion will also carry out servicing at both wind farms, which are located 60km north of Belgrade, for 15 years.

The turbines at Alibunar will have a hub height of 100 metres, Senvion said.
