A request from public company “Elektromreže Srbije” was delivered in Energy Agency in order to approve increase of prices for access and energy system consuming.

Public company “Elektromreže Srbije” has asked Energy Agency for approval when it comes to enlargement of prices for access and using electricity transmission system. EMS has also asked for price increase of its services for 37 percent on average, and accordingly, electricity transmission final price will not participate with 0.34 dinars per kilowatt-hour, but 0.46 dinars.

“Elektromreže Srbije” points that all technical losses of electricity they have to compensate with electricity buying and that influences the price increase of their services.

In Energy Agency is said that decision will be made after detailed analysis of validity because of which EMS has charged new prices.
