

In February 2021, nuclear power plant Krsko, jointly owned by Slovenia and Croatia, produced 467,199 MWh of net electricity, which is 1.6 % more than planned (460,000 MWh) for this month. Last February, NPP Krsko generated 483,359 MWh of net electricity. The plant is working under the constraints of technical specifications and all security systems were operable. Both the availability and the capacity factors stood at 100 % and there were no reported technical problems.
