

In September 2021, nuclear power plant Krsko, jointly owned by Slovenia and Croatia, produced 486,414 MWh of net electricity, which is 0.7 % less than planned (490,000 MWh) for this month. Last September, NPP Krsko generated 506,027 MWh of net electricity. The plant is working under the constraints of technical specifications and all security systems were operable. Both the availability and the capacity factors stood at 100 % and there were no reported technical problems.
