

Ukraine: Electricity exports income increased for period jan-may 2016

Categories : [SEE Energy News](#)

Date : June 10, 2016

In January-May 2016, Ukraine increased income from export of electricity by 24.3% in the amount to US \$ 75,024,000.

This is evidenced by the data of the State Customs Service of the fiscal.

76.79% of revenue from exports (57.613 million dollars) for the reporting period accounted for the supply of electricity in Hungary, and 22.74% (17.057 million USD.) to Poland.

In May 2016 the income from electricity exports amounted to \$ 14.91 million which is 43.75% more than in May 2015.

As reported, in 2015 Ukraine reduced the income from electricity exports by 3.2 times - from 487 million 186 thousand dollars, up to 150 million 57 thousand dollars, transmits Serbia-energy.eu
